

PROAX AT A GLANCE

Your Local Technical Automation Distributor

THE FASTEST GROWING AUTOMATION DISTRIBUTOR IN NORTH AMERICA

Since 1962, Proax Technologies has been a leading technical automation distributor that offers innovative products and solutions in the areas of: Automation & Robotics, Pneumatics, Industrial Controls, Mechanical Solutions, Motion Control & Machine Safety.

With coast-to-coast warehouses and millions of automation parts in stock, we are committed to ensuring your success with our superior customer service. Proax has local customer service representatives available for quote inquiries, delivery, and technical advice.

WHY PROAX

13
Locations coast to coast

260+
Employees (and growing)

4
Design and build shops

\$20M+
In inventory

3
Distribution centers

45+
Technical staff

6
Proof of concept centers

1962
Over 60 years of
marketplace experience

PROAX IS NOT YOUR AVERAGE DISTRIBUTOR

TECHNICAL EXPERTISE

Our in-house technical team delivers custom solutions and expert support to meet your automation needs. With specialists across all regions, we provide seamless integration and ongoing assistance to keep your operations running efficiently.

- Product support
- Proof of concept
- Start-up assistance
- Customized training sessions
- Engineering & programming support
- Design Value-Add
- Repair services
- Safety assessments & risk evaluations

NATIONAL PARTNERSHIPS

Proax is proud to hold national partnerships with our core manufacturers: SMC, Omron, ABB, Phoenix Contact, and Rittal. This allows us to provide you with the best possible customer service, technical support, delivery and pricing.

SAME DAY SHIPPING

Proax ensures fast and reliable shipping across Canada, with same day shipping available on eligible in-stock items.

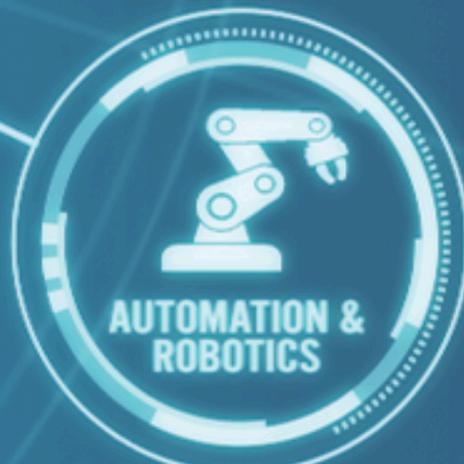

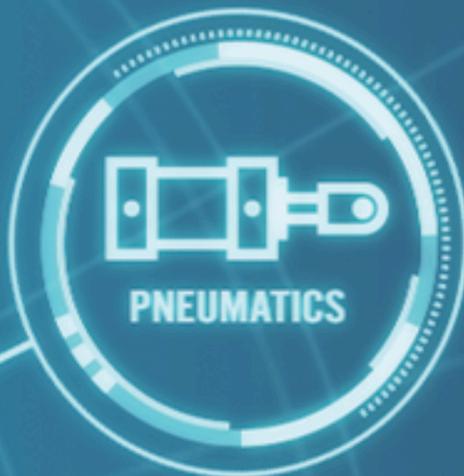

INVENTORY

With 200,000+ sq. ft. of warehouse space across Canada, Proax is here to support you and your inventory requirements.

WeAut

AUTOMATION

Value Beyond Components

Proax is a value-added distributor delivering complete automation solutions by combining best-in-class control, motion, safety, and automation technologies with deep application knowledge. From early concept support through system delivery and start-up, Proax helps our customers reduce complexity, improve performance, and accelerate time to value.

VALUE ADD

- Controls, motion, and safety expertise
- Material handling & end-of-line technologies
- Application-focused support
- Lifecycle services

ROBOTICS

Flexible Solutions from Design to Deployment

Proax is a trusted value-added distributor for ABB and Omron Robotics, helping customers select, deploy, and scale the right automation solutions with confidence. By combining leading robotic platforms with application expertise, controls knowledge, and local technical support, Proax reduces complexity, shortens deployment timelines, and maximizes return on automation investments.

VALUE ADD

- Proof of concept development
- Custom robotic engineering & programming
- In-house robot service & repair
- Preventative maintenance & repairs

PNEUMATICS

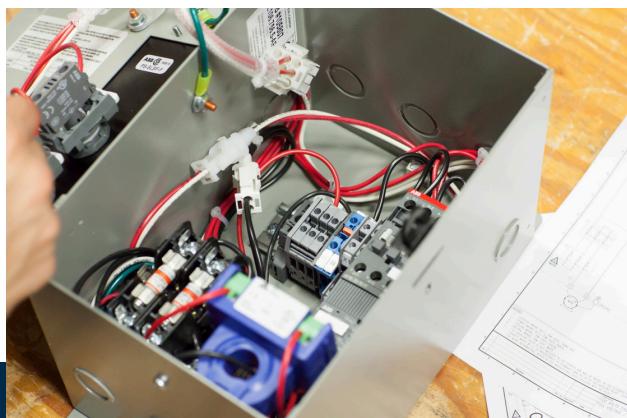

Canada's Leading SMC Elite Partner

As SMC Automation's largest partner in Canada and an Elite status holder, we provide comprehensive support across all your pneumatic and automation needs, from product selection through troubleshooting to full system optimization.

VALUE ADD

- Valve manifold assembly
- Actuator accessorization
- FRL assembly
- Custom pneumatic panel builds
- Air management and energy savings

From design support to full build capabilities, we help customers improve performance, efficiency, and long-term system reliability across Canada.

INDUSTRIAL CONTROLS

Seamless Connectivity and Control

Our offering includes a comprehensive range of industrial control services and products designed to address challenges related to compatibility, complexity, and support. We assist with machine connectivity and interfacing, data management, motor control, low voltage circuit protection, power breakers, and switchgear.

VALUE ADD

- Custom cutouts for enclosures
- Engineering and programming support

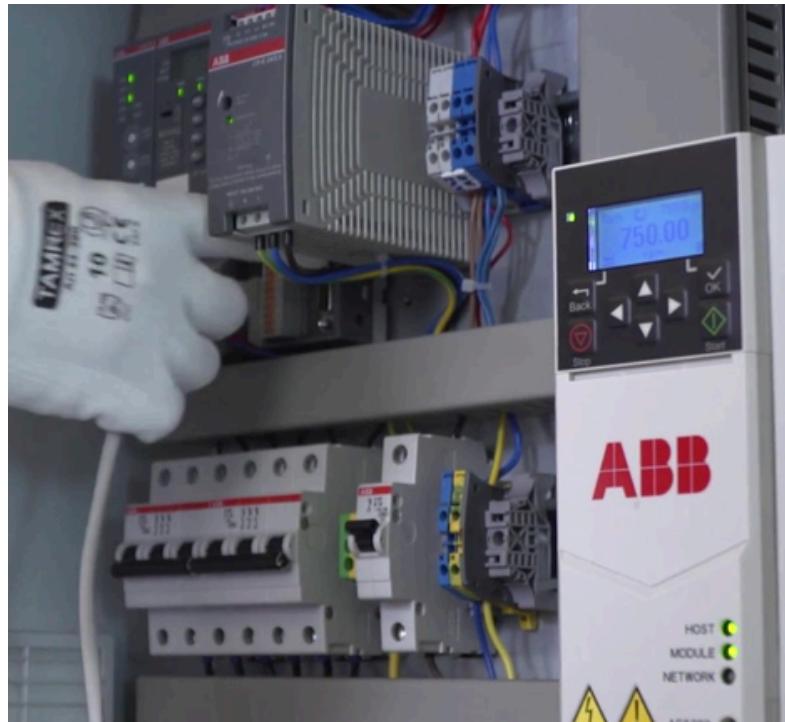

MOTION CONTROL

Precision Solutions for Complex Applications

With extensive experience in sizing motor control solutions for a wide range of mechanical systems, we support high-speed applications, torque-limiting requirements, and precise repeatable positioning to help you overcome application challenges while maximizing system performance and machine life.

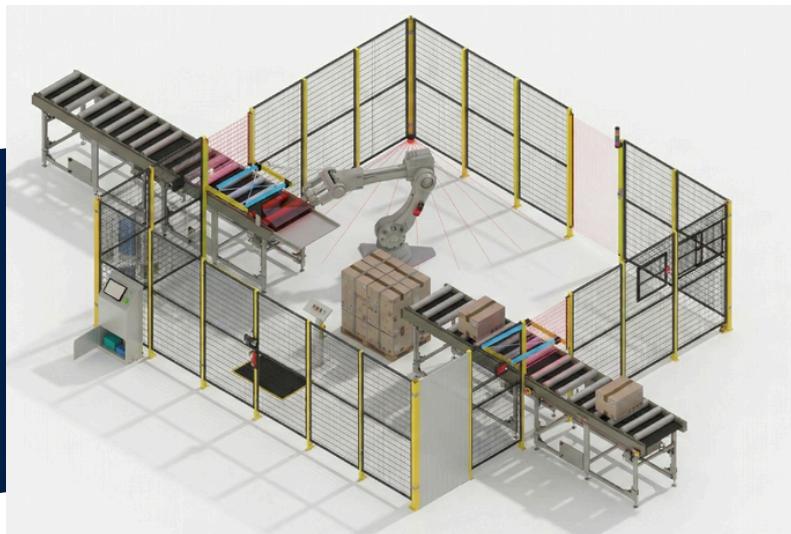

VALUE ADD

- Application analysis
- Sizing of mechanical systems
- System model development
- Proof of concept
- On-site evaluation and implementation
- Service support capabilities
- Start-up and maintenance

MACHINE SAFETY

Elevate your Level of Safety with Certified Expertise

Whatever your safety needs, our machine safety experts can help you assess and mitigate hazards for a safer workplace. Our B11 and TÜV-certified specialists focus on hazard identification, risk mitigation, and fostering a strong safety culture in your organization.

- Risk assessments
- Safety walkthroughs
- Pre-start checks
- System start-up
- Safety training
- Safe distance calculations

MECHANICAL

End-to-End Design, Build, and Installation

Our mechanical design team works closely with customers to understand their project requirements and to help create durable, efficient solutions. We support everything from early design to full assembly and installation, ensuring a seamless fit into your operations.

VALUE ADD

- Mechanical project assessment
- 3D modeling and custom mechanical design
- Assembly and installation
- Customizable extrusion solutions
- Four in-house design and build shops

PROJECT WORKFLOW

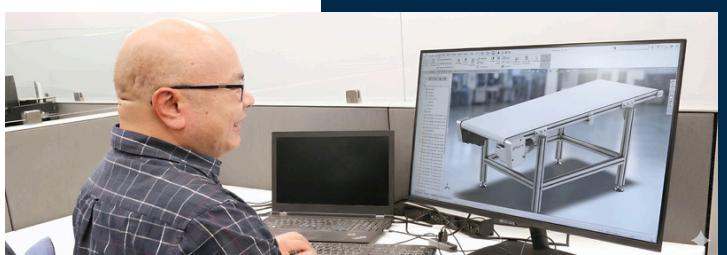

EXPERT CONSULTATION

We assess your mechanical and electrical automation needs and translate project requirements into clear design goals.

CUSTOM DESIGN & ENGINEERING

Our team develops detailed mechanical designs and prepares your solution for your build and integration project needs.

INNOVATIVE SOLUTIONS

We assemble and test your system to ensure reliable performance and a seamless fit into your operations.
