

ROBOTUNITS - THE MODULAR AUTOMATION SYSTEM

ROBOTUNITS

Proax Technologies is the authorized distributor of Robotunits in Canada, providing a wide range of extrusions, technical support and design engineering. We have the expertise to design, build and develop projects from inception to final production. Whatever your project or solution requirements, you can be assured that Proax has the product knowledge and capabilities to suit your needs.

40mm Series

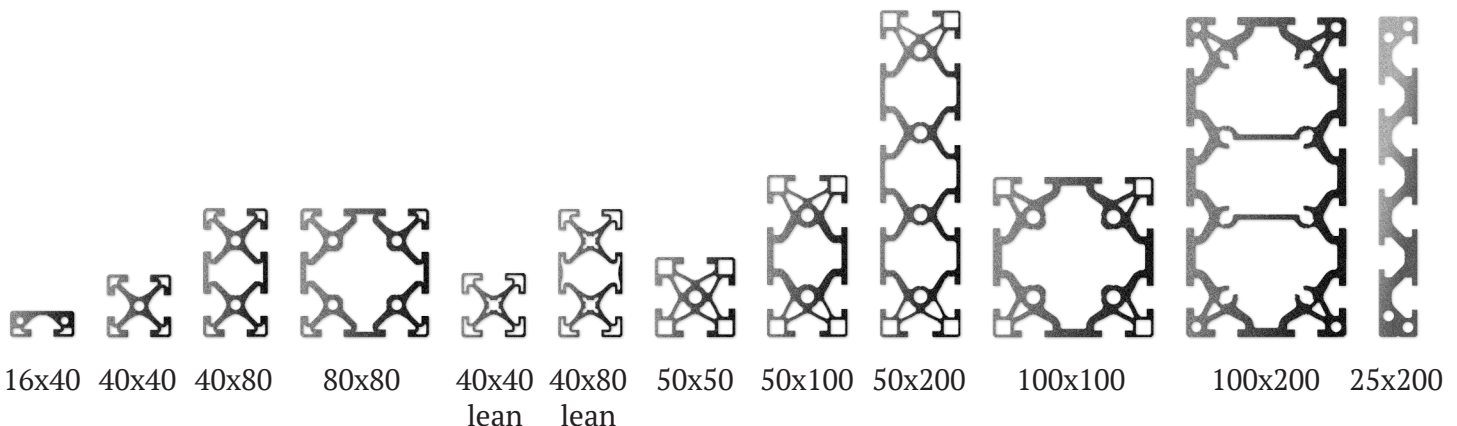

- ✦ No drilling, no welding
- ✦ Rigid Connection
- ✦ Two sided fastener
- ✦ Compatible with 50mm series

50mm Series

- ✦ No drilling, no welding
- ✦ Rigid Connection
- ✦ Two sided fastener
- ✦ Vibration Resistant

✦ 12 extrusion sizes, 1 T-slot size fits all

Custom Design

Our Mechanical Design Team utilizes 3D CAD software to develop structural applications.

Machine Base, Fixtures & Frames

Every Structure is designed and validated to perform and provide the appropriate stability it requires.

Machine Guarding

Meets all safety codes and protects from hazards.

Conveyors

Part movements from A to B.
Customized configurations.

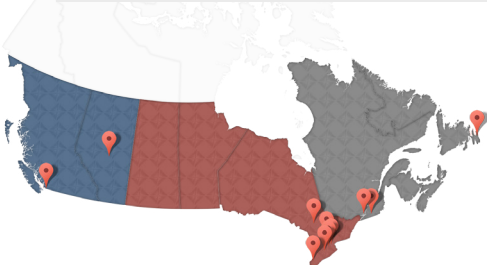

Linear Motion

Standard products for custom solutions.
